Open water — the gate holds

post-VV

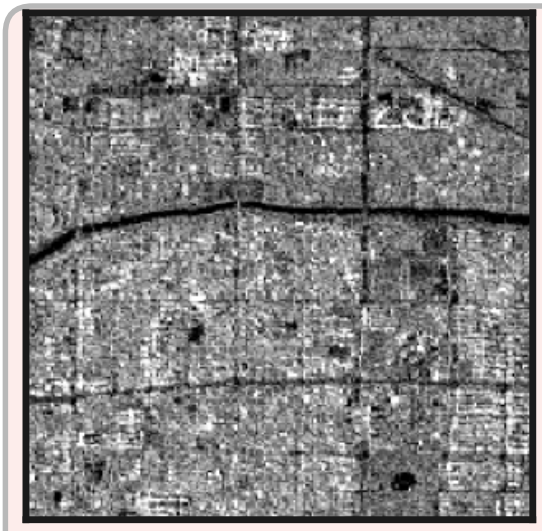

dark water and intensity change → gate holds

config F mask

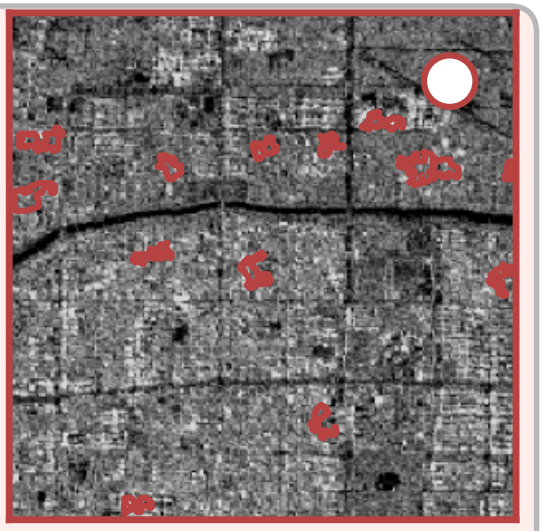

No labels, no training: the rule commits the open-water flood.

Urban — the physical premise fails

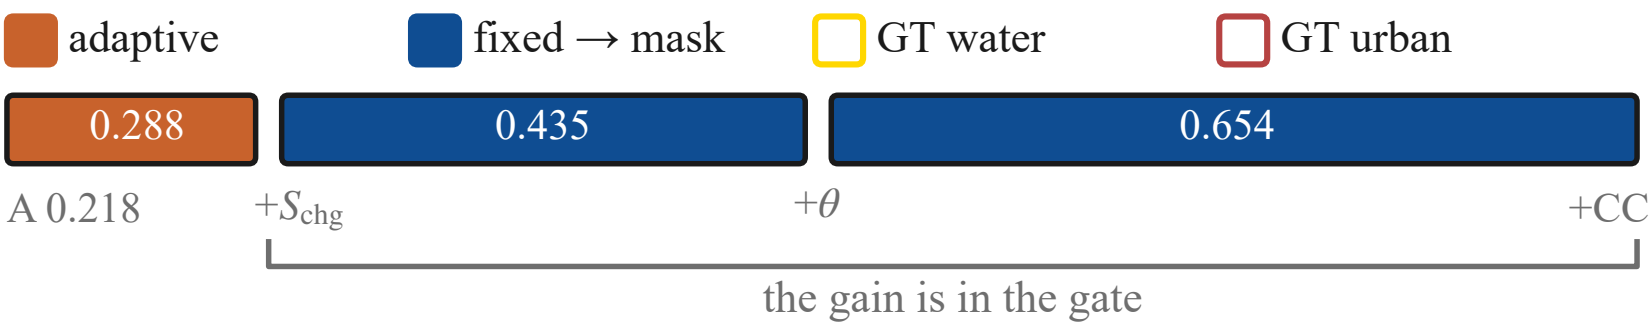

post-VV

buildings are bright, so the dark bound fails

config F mask (empty)

Same rule, same thresholds: nothing committed — context-defined target.

config F 0.654 vs CNN 0.555 — 3/3 events
